

Braxton, Age 1

Phenylketonuria (PKU) | Wyoming | Annual costs: \$9600

Not having to worry about paying for medical nutrition would be a huge relief to our family. NO family should have to pay for these things, or should at least have the support of their insurance company! This is a huge burden and we deserve coverage. Insurance helps cover formula, but it is subject to deductible. They absolutely do not cover food products, and are still considering this treatment to be experimental.

Braxton depends on medical nutrition to stay healthy. Braxton and thousands of others across the country are depending on you to co-sponsor the Medical Nutrition Equity Act. Please contact the offices of Sen. Casey, Rep. McGovern or Rep. Herrera Beutler.
