

Jamieson

Inborn Errors of Metabolism and Conditions on the RUSP | New Jersey | Annual costs: \$18000

Medical foods coverage would allow my son, who has Complex 1 Deficiency and Pyruvate Dehydrogenase Deficiency, to use his Social Security money for something other than very low carb foods and Ketocuisine. My husband and I have employer sponsored healthcare that we pay into. My son, who is an adult, has Medicaid.

Jamieson depends on medical nutrition to stay healthy. Jamieson and thousands of others across the country are depending on you to co-sponsor the Medical Nutrition Equity Act. Please contact the offices of Sen. Casey, Rep. McGovern or Rep. Herrera Beutler.
